LEGEND

When international, state, county and/or MDC/MSD boundaries coincide the map shows the boundary symbol for only the highest ranking of these boundaries.

Geographic area names are followed by either their FIPS or census code.

1. "A" following an MDC name designates "Area MDC". "C" following a place name indicates that it is a "Census Tract" with the same name and FIPS code as the place. An "MDC" label is used for "Metropolitan Division".

2. Place label color corresponds to the place FIPS code.

3. Census tracts are identified by an 11-digit census tract number and may have an optional two-digit suffix. For example 21 or 141700. The census tract codes consist of six digits with an optional district between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros and trailing zeros for completion - 11 digits total. The last number typically shows the basic census tract number and the last two digits show the district.

All local boundaries and names as of January 1, 2020. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only. They do not represent the official boundaries of any government entity.

LEGEND

When international, state, county, and/or MDC/DCD boundaries coincide, the map shows the boundary symbol for only the highest ranking of those boundaries.

Geographic area names are followed by either their FIPS or census code.

1. A "1" following an MDC name denotes a large MDC. A "2" following a place name indicates that a large MDC exists with the same name and FIPS code as the place; the other MDC is a small MDC.

2. Place labels correspond to the place FIPS code.

3. Census tracts are identified by an 11-digit census tract number and may have an optional two-digit suffix, for example 21 or 2100. The census tract number consists of six digits with an optional decimal between the fourth and fifth digit corresponding to the basic census tract number but with leading zeros and trailing zeros for consistency. "1000" suffixes are used for census tracts that do not have a suffix.

4. The "0" suffix corresponds to the basic census tract number.

5. The "00" suffix corresponds to the basic census tract number.

6. The "000" suffix corresponds to the basic census tract number.

7. The "0000" suffix corresponds to the basic census tract number.

8. The "00000" suffix corresponds to the basic census tract number.

9. The "000000" suffix corresponds to the basic census tract number.

10. The "0000000" suffix corresponds to the basic census tract number.

11. The "00000000" suffix corresponds to the basic census tract number.

12. The "000000000" suffix corresponds to the basic census tract number.

13. The "0000000000" suffix corresponds to the basic census tract number.

14. The "00000000000" suffix corresponds to the basic census tract number.

15. The "000000000000" suffix corresponds to the basic census tract number.

16. The "0000000000000" suffix corresponds to the basic census tract number.

17. The "00000000000000" suffix corresponds to the basic census tract number.

18. The "000000000000000" suffix corresponds to the basic census tract number.

19. The "0000000000000000" suffix corresponds to the basic census tract number.

20. The "00000000000000000" suffix corresponds to the basic census tract number.

21. The "000000000000000000" suffix corresponds to the basic census tract number.

22. The "0000000000000000000" suffix corresponds to the basic census tract number.

23. The "00000000000000000000" suffix corresponds to the basic census tract number.

24. The "000000000000000000000" suffix corresponds to the basic census tract number.

25. The "0000000000000000000000" suffix corresponds to the basic census tract number.

26. The "00000000000000000000000" suffix corresponds to the basic census tract number.

27. The "000000000000000000000000" suffix corresponds to the basic census tract number.

28. The "0000000000000000000000000" suffix corresponds to the basic census tract number.

29. The "00000000000000000000000000" suffix corresponds to the basic census tract number.

30. The "000000000000000000000000000" suffix corresponds to the basic census tract number.

31. The "0000000000000000000000000000" suffix corresponds to the basic census tract number.

32. The "00000000000000000000000000000" suffix corresponds to the basic census tract number.

33. The "000000000000000000000000000000" suffix corresponds to the basic census tract number.

34. The "0000000000000000000000000000000" suffix corresponds to the basic census tract number.

35. The "00000000000000000000000000000000" suffix corresponds to the basic census tract number.

36. The "000000000000000000000000000000000" suffix corresponds to the basic census tract number.

37. The "0000000000000000000000000000000000" suffix corresponds to the basic census tract number.

38. The "00000000000000000000000000000000000" suffix corresponds to the basic census tract number.

39. The "000000000000000000000000000000000000" suffix corresponds to the basic census tract number.

40. The "0000000000000000000000000000000000000" suffix corresponds to the basic census tract number.

41. The "00000000000000000000000000000000000000" suffix corresponds to the basic census tract number.

42. The "000000000000000000000000000000000000000" suffix corresponds to the basic census tract number.

43. The "00" suffix corresponds to the basic census tract number.

44. The "000" suffix corresponds to the basic census tract number.

45. The "00" suffix corresponds to the basic census tract number.

46. The "000" suffix corresponds to the basic census tract number.

47. The "00" suffix corresponds to the basic census tract number.

48. The "000" suffix corresponds to the basic census tract number.

49. The "00" suffix corresponds to the basic census tract number.

50. The "000" suffix corresponds to the basic census tract number.

LEGEND

When international, state, county, and/or MDC/CCD boundaries coincide the map shows the boundary symbol for only the highest ranking of those boundaries.

Census tracts are defined by either their 1990 or census code.

1. A "1" following an MDC name denotes a "Major Division". A "1" following a place name indicates that a place is a CDP with the same name and FIPS code as the place; the other "1" is a local name.

2. Place label color corresponds to the place ID color.

3. Census tracts are identified by an 11-digit census tract number and may have an optional two-digit suffix, for example 21 or 1407.02. The census tract code consists of eight digits with an optional decimal between the seventh and eighth digit corresponding to the basic census tract number but with leading zeros and trailing zeros for comparison - "00000000". The last two examples above would be coded 00000000 and 1407.02, respectively.

4. All local boundaries and names are as of January 1, 2020. The boundaries shown on this map are for Census tracts and are not subject to change and are not subject to change.

5. The Census Bureau's 2020 Census redistricting plan is available at <https://www.census.gov/redistricting/plans.html>.

6. Geographic Year: 2020 Census Reference Date: January 1, 2020

2. Place label color corresponds to the place 100 code.		2. Place label color corresponds to the place 100 code.	
3. Census routes are identified by an asterisk in the map number and may have an optional two-digit suffix, for example 21 or 2107. The census route number consists of the route number or optional suffix between the month and dash, corresponding to the basic census tract number, but with leading zeros and trailing zeros for complete 4-digit routes. The route number examples shown would be 010000 and 10000, respectively.		3. Classified City	*****				

When international, state, county, and/or MCD/CCD boundaries coincide, the map shows the boundary symbol for only the highest ranking of those boundaries.

Census tracts are defined by either their 10th or census code.

1. A "1" following an MCD name designates a "1" following a place name indicates that a 100,000 census with the same name and 100,000 as the place. The other 100,000 census codes are 100,000 and 100,000.

2. Place label color corresponds to the place ID color.

3. Census tracts are identified by a 5-digit census tract number and may have an optional 4-digit suffix, for example 21 or 2100. The census tract number consists of four digits with an optional decimal between the fourth and fifth digit corresponding to the basic census tract number but with leading zeros and trailing zeros for comparison. For example, the census tract number 010000 would be coded as 010000 and 010000.

4. All legal boundaries and areas are as of January 1, 2020. The boundaries shown on this map are for Census tracts and are not state, county, or local government boundaries. They are for informational purposes only and do not constitute a representation of any jurisdiction's official boundaries.

Geographic Year: 2020 Census Reference Date: January 1, 2020
 This Census Tract Reference Map (TRM) is based on the 2020 Census. It was created by Geography Division, January 28, 2022.
